

## Utimaco Extends Worldwide Cooperation for Secure Mobile Computing on ThinkPad and ThinkCentre PCs

- Life insurance company, **Scottish Widows**, is one of the first customers benefiting from the joint security solution
- Utimaco's **SafeGuard® PrivateDisk** alongside **SafeGuard® Easy** is integrated into **ThinkVantage Technologies**
- Utimaco has recently become a **Global Platinum Partner** in **Lenovo's Alliance Marketing Program**

**Oberursel, July 12th 2005 - Utimaco, the major European manufacturer of professional IT security solutions, has agreed to work with Lenovo to further extend cooperation to advance mobile security on ThinkPad and ThinkCentre PCs. This business relationship aims to generate joint worldwide activities to market Utimaco's SafeGuard security solutions within the overall concept of Lenovo's ThinkVantage Technologies.**

Scottish Widows, a life insurance company, is one of the first customers to benefit from the joint security solution. Utimaco's SafeGuard PrivateDisk is primarily aimed at medium-sized enterprises to meet their growing needs to secure confidential data in a very simple and efficient way. Both SafeGuard solutions seamlessly integrate with Lenovo's onboard security chip and Rescue and Recovery tools.

Glenn Anderson, Infrastructure Architect at Scottish Widows, explained: "The seamless integration of SafeGuard Easy from Utimaco with Lenovo ThinkPad notebooks is the best solution for us to secure all our new 2,000 Microsoft XP notebooks."

"We are very proud that, after stringent testing, Lenovo has chosen us to become an alliance partner in its top level Global Platinum Partner Alliance Program. The relationship with Lenovo assists us in marketing our solutions in the enterprise segment, worldwide, and also among medium-sized enterprises," justifies Martin Wülfert, CEO of Utimaco.

Since October 2004, Utimaco's SafeGuard Easy full hard disk encryption solution has been offered as a security option for ThinkCentre desktops and ThinkPad notebooks worldwide. In April 2005, Lenovo added Utimaco's folder encryption product to their portfolio.

Utimaco Safeware AG is one of the leading producers of professional IT security solutions. The security technology and solutions developed by Utimaco protect the electronic data of companies and government bodies against unauthorized access and guarantee that business processes and administrative procedures in the electronic world are binding and confidential. Utimaco Safeware's Personal Device Security division supplies technologies and solutions for mobile security in the areas of high-level authentication including biometric techniques, encryption and integrity checks. Its products and solutions secure data in terminal server and Citrix environments, on the PC, notebook and PDA at the workplace, and on the move. Utimaco Safeware's Transaction Security division specializes in security solutions for e-business, e-government and e-payment based on its own technologies (telecommunications management systems, hardware security modules, gateways for e-mail security, authentication and digital signatures, Public Key Infrastructure (PKI), and PKI-enabled applications).
