

RSA, The Security Division of EMC, certifies technical interoperability between Utimaco's SafeGuard Easy and RSA SecurID® technology

- **SafeGuard Easy now technically interoperable with RSA SecurID® SID800 hardware authenticator**
- **Utimaco joins RSA Secured® Partner Program and forms worldwide technology partnership**

Oberursel, November 27, 2006, RSA, The Security Division of EMC, has certified through the RSA Secured Partner Program that Utimaco's SafeGuard Easy solution for hard disk encryption and the RSA SecurID® SID800 hardware authenticator are both technically compatible. Companies can now leverage the joint solution to provide an additional layer of information-centric security in order to further protect sensitive data saved on PCs and notebooks.

Achieving technical interoperability with these products from Utimaco and RSA helps to maximize data protection by applying the principle of "something you have, and something you know". In this manner, only someone with a PIN that unlocks the key stored on the RSA SecurID SID800 hardware authenticator can access the computer and the data protected by SafeGuard Solutions.

"The technical interoperability between SafeGuard Easy for protecting against data theft coupled with two-factor authentication technology from RSA helps to meet regulatory compliance mandates for data protection," said Stu Cohen, Director of Partner Development at RSA, The Security Division of EMC. "There is high demand for information-centric security solutions, which we can help to meet by working together with Utimaco, a market leader in data security."

"There are more than 20 million users of RSA SecurID technology, spanning over 20,000 organizations worldwide. The cooperation between Utimaco and RSA, the expert in information-centric security, was therefore the next logical step," said Helmut Dansachmüller, Head of Strategic Alliances at Utimaco. "Companies will now also be able to use the RSA SecurID SID800 hardware authenticator for secure logon to SafeGuard Easy. One of our joint customers, a large pharmaceutical group, is currently working on the roll-out of the joint solution."

Utimaco Solution Portfolio

The comprehensive SafeGuard Solution Portfolio from Utimaco provides the full spectrum of data confidentiality and integrity wherever you are, whatever you do.

SafeGuard Shield protects data on end devices and in networks (data at rest)

SafeGuard Easy: Hard disk encryption and pre-boot authentication

SafeGuard PDA: Secure authentication and data encryption on PDAs and smartphones

SafeGuard PrivateDisk: Easy and powerful encryption of files and folders in virtual drives

SafeGuard LAN Crypt: Group-based and transparent multi-user encryption

SafeGuard CryptoServer: Hardware Security Module for master key protection and electronic processes

SafeGuard Transit secures data during transmission (data in motion)

SafeGuard Mail Gateway: Encryption appliance for central e-mail security

SafeGuard PushMail: E-mail security for push mail services

SafeGuard RemovableMedia: Security-To-Go protection for all removable media (*shipping Q1*)

SafeGuard PrivateCrypto: Security-To-Go protection for all removable media

SafeGuard SignatureServer: Security solution for generating qualified digital signatures

SafeGuard Process secures data during processing (data in use)

SafeGuard CryptoServer: Hardware Security Module for master key protection and electronic processes

SafeGuard Signatur Server: Security solution for generating qualified digital signatures

Utimaco Safeware AG – The Data Security Company.

Utimaco is a world leading producer of professional solutions that secure data within companies and government agencies. The solutions, which have won multiple awards, protect data against unauthorized access and manipulation no matter where it's stored – on mobile personal devices, PCs or on networks or is being transferred to business partners or processed in business applications. SafeGuard Easy, with more than three million installations, is the best selling worldwide solution for protecting data on notebooks and PCs. Utimaco is also a leader in electronic transaction protections. In Germany, for example, Utimaco solutions secure over 90 percent of all card-based payment systems. Utimaco offers its customers comprehensive on site support via a worldwide network of partners and subsidiaries in Europe, the USA and Asia. Utimaco Safeware AG, with headquarters in Oberursel, near Frankfurt, Germany, is listed on the Frankfurt Stock Exchange (ISIN DE0007572406).
