

CeBIT 2006: New-generation product from Utimaco offers first ever integrated data security solution

- **Utimaco Safeware AG presents prototype of the SafeGuard Enterprise product suite including five security modules**
- **New modular architecture with central Management Center enables cross-platform implementation of security guidelines**

Oberursel, March 10, 2006 - Utimaco – The Data Security Company, presents a prototype of its SafeGuard Enterprise product suite at CeBIT to address data security in medium and large enterprises. The central Management Center, at the heart of the modular solution, enables the cross-platform implementation of security guidelines on current operating systems.

The new product suite will include five security modules: device encryption, file and folder encryption, secure data exchange, configuration protection, as well as the central Management Center. Having developed its world-wide renown SafeGuard product line further, Utimaco now offers a solution that balances security, productivity and cost, based on the new SafeGuard security architecture.

The first release of SafeGuard Enterprise includes the SafeGuard Device Encryption module for protecting data on devices and the central SafeGuard Management Center. A comprehensive administration function permits the simple definition, implementation and control of enterprise-wide security guidelines on stationary and mobile devices, as well as in networks. The first release of SafeGuard Enterprise will be available from autumn 2006. Further releases will follow, with new modules that can be combined as needed.

"SafeGuard Enterprise enables companies to implement their security guidelines centrally and in a simple and flexible manner for the first time," says Martin Wülfert, Chairman of the Executive Board of Utimaco Safeware AG. "With this groundbreaking product strategy, Utimaco will continue to enhance its leading position in the high-growth IT security market."

More information about the products and about Utimaco can be found online, at: www.utimaco.com

Utimaco Safeware AG - The Data Security Company.

Utimaco is a world leading producer of professional solutions that secure data within companies and government agencies. The solutions, which have won multiple awards, protect data against unauthorized access and manipulation no matter where it's stored on mobile personal devices, PCs or in networks. SafeGuard Easy, with nearly three million installations, is the best selling worldwide solution for protecting data on notebooks and PCs. Utimaco is also a leader in electronic transaction protections. In Germany, for example, Utimaco solutions secure over 90 percent of all card-based payment systems. Utimaco offers its customers comprehensive on site support via a worldwide network of partners and subsidiaries in Europe, the USA and Japan. Utimaco Safeware AG, with headquarters in Oberursel, near Frankfurt, Germany, is listed on the Frankfurt Stock Exchange (ISIN DE0007572406).
