

**Utimaco – The Data Security Company, Hall 7 / Stand A 28 –  
Press Breakfast: March 16<sup>th</sup>, 9:00 A.M., CC Room 104**

## **CeBIT 2007: Utimaco Presents SafeGuard Enterprise – the Suite for Central Management of Data Security Solutions**

- **SafeGuard Enterprise, the Data Security Suite with complete all-round protection for medium- and large-sized businesses and organizations**
- **SafeGuard Removable Media 1.1 allows flexible and simple encryption of removable media**
- **Utimaco's comprehensive SafeGuard solution portfolio offers data protection during storage, transmission and processing.**

**Oberursel, January 9th, 2007. For the first time, Utimaco will present its data security suite SafeGuard Enterprise at CeBIT stand A 28 in hall 7. from March 15 – 21, the Data Security Company will demonstrate the new version 5.0 of its modular SafeGuard Enterprise solution, which medium- and large-sized businesses and government agencies can use to protect the confidentiality and integrity of their data. For all those who want to secure storage media such as external hard drives, USB sticks and MP3 players against unauthorized access and manipulation, SafeGuard RemovableMedia is here. Whether software or hardware: With its comprehensive product lines SafeGuard Shield, SafeGuard Transit and SafeGuard Process, Utimaco offers the optimum data security tool to meet any requirements.**

### **SafeGuard Enterprise 5.0**

As a special CeBIT highlight, Utimaco will present SafeGuard Enterprise, the next generation of data security. The Data Security Suite protects medium and large-sized organizations against data theft and guarantees the confidentiality and integrity of your valuable company data. SafeGuard Enterprise 5.0 is based on modular architecture and a central management console, which enables easy-to-use administration of users, security guidelines and cryptographic keys across multiple platforms. The new security suite is particularly suited to companies who need to manage a larger number of end devices and removable media in heterogeneous system landscapes.

### **SafeGuard RemovableMedia 1.1**

The new SafeGuard RemovableMedia 1.1 enables flexible and transparent encryption and decoding of all types of removable media such as USB sticks and MP3 players. With SafeGuard RemovableMedia, data is encrypted at all times and protected against unauthorized access, even when the end device is removed. The read and write functions allow for transmission and reading of files from a mobile data device to one or more computers without installing encryption software. With this flexible software, you can implement both restrictive and flexible security guidelines. In particular the mobile workforce will benefit from the fact that they can read encrypted data on their mobile storage media anywhere, and at the same time adhere to their company's security standards.

### Utimaco's SafeGuard Solution Portfolio

Utimaco's award-winning, comprehensive SafeGuard solution portfolio, consisting of **SafeGuard Shield**, **SafeGuard Transit** and **SafeGuard Process**, embraces the entire spectrum of data confidentiality and integrity: during storage, transmission and processing. (For further information about the SafeGuard solution portfolio, see "Note to the editor").

### Press Conference

On CeBIT Friday, March 16, from 9.00 am until 10.00 am in CC room 104, Utimaco will host a press breakfast to discuss the company's brand-new security topic, and to demonstrate the new solution SafeGuard Enterprise 5.0.

### Note to the editor

#### Utimaco Solution Portfolio

The comprehensive SafeGuard Solution Portfolio from Utimaco provides the full spectrum of data confidentiality and integrity wherever you are, whatever you do.

#### **SafeGuard Shield protects data on end devices and in networks (data at rest)**

**SafeGuard Easy:** Hard disk encryption and pre-boot authentication

**SafeGuard CryptoServer:** Hardware Security Module for master key protection and electronic processes

#### **SafeGuard Transit secures data during transmission (data in motion)**

**SafeGuard Mail Gateway:** Encryption appliance for central e-mail security

**SafeGuard PushMail:** E-mail security for push mail services

**SafeGuard RemovableMedia:** Security-to-go protection for all removable media

**SafeGuard PrivateCrypto:** Easy encryption of e-mail attachments and other files

**SafeGuard SignatureServer:** Security solution for generating qualified digital signatures

#### **SafeGuard Process secures data during processing (data in use)**

**SafeGuard CryptoServer:** Hardware Security Module for master key protection and electronic processes

**SafeGuard SignatureServer:** Security solution for generating qualified digital signatures

#### Utimaco Safeware – The Data Security Company.

Utimaco is the leading provider for data security solutions. The Data Security Company enables mid-sized to large organizations to safeguard their data assets against attacks and to comply with privacy laws by protecting their confidentiality and integrity. In response to twenty-first century threats – the new world of Data Security 2.0 – Utimaco's complete range of solutions provide full 360° protection unlike free, end-point or built into encryption solutions which only cover specific security needs. Its advanced SafeGuard Solutions help to manage and secure data in what ever conditions: during storage (data at rest), during transmission (data in motion) and during processing (data in use). Utimaco offers its customers comprehensive on site support via a worldwide network of partners and subsidiaries in Europe, the USA and Asia. Utimaco Safeware AG, with headquarters in Oberursel, near Frankfurt, Germany, is listed on the Frankfurt Stock Exchange (ISIN DE0007572406).
